## AB&I Foundry Joins Tyler Pipe & Coupling as an ASPE Affiliate Sponsor

The American Society of Plumbing Engineers (ASPE) is pleased to announce that AB&I Foundry has joined our Affiliate Sponsor program as part of Tyler Pipe & Coupling's renewal for the coming year.

Part of the McWane family of companies, AB&I and Tyler Pipe are both leading U.S. manufacturers of cast iron soil pipe and fittings. Located in Oakland, California, AB&I also has a Custom Casting Division that can manufacture specialized products, and Tyler Pipe has a foundry in Tyler, Texas and a coupling plant in Marshfield, Missouri.

As ASPE Affiliate Sponsors, AB&I and Tyler Pipe receive year-round brand reinforcement and company recognition through exposure in *Plumbing Engineer* magazine and *ASPE Pipeline*, on ASPE's social media platforms and ASPE's website, and at national ASPE events. The companies also will receive five complimentary one-year ASPE memberships and, as new benefits of the program, will be able to send new product emails to ASPE membership and distribute an annual case study. ASPE also has recently developed a section on its website devoted exclusively to Affiliate Sponsors ([aspe.org/affiliates](http://aspe.org/affiliates)).

"The McWane Plumbing Group's partnership with ASPE aligns perfectly with our mission to partner with engineering professionals and help to educate them about our quality products that meet or even exceed the requirements of the specifications," says Kurt Winter, EVP of McWane Plumbing Group. "ASPE's dedication and commitment to the plumbing engineering community directly supports our focus of driving greater awareness about the need to specify safe, non-combustible piping materials."

"ASPE Affiliate Sponsors are great supporters and educators of the plumbing engineering industry, and I hope our members learn more about the proper applications of cast iron pipe from this new partnership," says Brian Henry, ASPE's Director of Affiliate Relations.

To learn more about becoming an ASPE Affiliate Sponsor, contact Brian Henry at [bhenry@aspe.org](mailto:bhenry@aspe.org) or 847-296-0002 x235.

###

**About ASPE:** The American Society of Plumbing Engineers (ASPE) is the international organization for professionals skilled in the design, specification and inspection of plumbing systems. ASPE is dedicated to the advancement of the science of plumbing engineering, to the professional growth and advancement of its members and the health, welfare and safety of the public. The Society disseminates technical data and information, sponsors activities that facilitate interaction with fellow professionals, and, through research and education, expands the base of knowledge of the plumbing engineering industry. ASPE members are leaders in innovative plumbing design, effective materials and energy use, and the application of advanced techniques throughout the world. For additional information visit [www.aspe.org](http://www.aspe.org).

**About AB&I:** AB&I Foundry has been an American manufacturer of cast iron soil pipe and fittings for storm and sanitary drain, waste, and vent (DWV) plumbing systems since 1906. Today's AB&I combines the perspectives and values of their founders with the methods and technologies of today. AB&I products are "Made in America" and have set the standard for quality and durability. For more information please visit [ABIFoundry.com](http://ABIFoundry.com).

**About Tyler Pipe:** Tyler Pipe and Coupling has a long history as America's largest producer of cast iron soil pipe and fitting and no-hub couplings for drain, waste, and vent (DWV) plumbing systems. All Tyler products are manufactured right here in the USA. Cast iron soil pipe and fittings are used in commercial and high-rise construction. Tyler products are a GREEN solution using 100% scrap-metal to manufacture their products, and they are 100% recyclable at the end of service. For more information please visit [TylerPipe.com](http://TylerPipe.com).
